Sports Terminologies

Sports Terminologies

Sports terminology refers to the specialized vocabulary unique to each sport, including terms related to equipment, techniques, strategies, postures, and rules. These terms help athletes, coaches, and fans communicate effectively and understand the specific nuances of the game.

Cricket

Important Terminology

Cricket involves essential equipment like a **bat**, **ball**, **stumps or wickets**, and **bails**, alongside protective gear such as a **helmet**, **arm guard**, **chest guard**, **elbow guards**, **jockstrap**, and **gloves**. The game includes terms like a **dead ball** (when play is stopped), **follow-on** (forcing the opposing team to bat again), and **not out** (a batsman not dismissed). Bowling techniques include **spin-bowling**, the deceptive **googly**, and the unique **Chinaman**, where a left-handed bowler spins the ball from off to leg against a right-handed batsman. Batting strokes like the **cover drive**, **hook**, **pull**, **sweep**, and **glance**, along with errors like an **overthrow**, add to the game's dynamic nature. A bowler's **follow-through** ensures accuracy and momentum after delivery.
